

# Art Of Sound

*The unusually-shaped cartridge has had all superfluous body-work stripped away to drop weight down to a low 6gm while stabilising the generator in a rigid frame.*

*Clear colour-coded pins along with tapped screw holes makes fitting the A95 a relatively easy operation.*

## CONCLUSION

Dry, fast, extremely detailed and almost concussive, the A95 is a highly tuned mechanical statement. It is not lush, warm or cuddly, but rather a machine of insight and deep analysis.

Massively capable, the A95 is a cartridge that makes the LP sound better all-round than I have ever heard it. Almost frightening! It is sort of CD like in its qualities – only better.

**ORTOFON A95**  
£3,750

**OUTSTANDING** - amongst the best.

### VERDICT

An advanced-technology MC cartridge that digs deep and reveals all. Forensic ability and fast, dynamic sound.

### FOR

- fast, punchy sound
- easy to fit
- easy to use

### AGAINST

- needs super quiet preamp
- cool character
